**Donald Davidson: Life and Words** Maria Baghramian, 2013-09-13 Donald Davidson 1917 2003 was one of the most prominent philosophers of the second half of the twentieth century His thinking about language mind and epistemology has shaped the views of several generations of philosophers This book brings together articles by a host of prominent philosophers to provide new interpretations of Davidson s key ideas about meaning language and thought The book opens with short commemorative pieces by a wide range of people who knew Davidson well giving us glimpses into the life of a great philosopher a beloved husband and father a colleague teacher and friend The chapter by Lepore and Ludwig and the ensuing heated debate with Frederick Stoutland on how to interpret Davidson demonstrate why Davidson s legacy has become a disputed intellectual territory The chapters by Kathrin Gl er Peter Pagin Barry Smith James Higginbotham and William Child all eminent philosophers of language are prime examples of just one strand of this legacy while the piece by Sophie Gibb gives us an opening to Davidson s enormous contribution to philosophy of mind Donald Davidson Life and Words closes with a piece by Davidson himself first published in 1995 in the International Journal of Philosophical Studies where he brings together the various strands of his work in a Unified Theory of speech and action This book comprises key articles first published in the International Journal of Philosophical Studies and previously unpublished commemorative pieces and serves as a fitting dedication to the work and memory of a great philosopher

**Kant and Non-Conceptual Content** Dietmar Heidemann, 2014-06-11 Conceptualism is the view that cognizers can have mental representations of the world only if they possess the adequate concepts by means of which they can specify what they represent By contrast non conceptualism is the view that mental representations of the world do not necessarily presuppose concepts by means of which the content of these representations can be specified thus cognizers can have mental representations of the world that are non conceptual Consequently if conceptualism is true then non conceptualism must be false and vice versa This incompatibility makes the current debate over conceptualism and non conceptualism a fundamental controversy since the range of conceptual capacities that cognizers have certainly has an impact on their mental representations of the world on how sense perception is structured and how external world beliefs are justified Conceptualists and non conceptualists alike refer to Kant as the major authoritative reference point from which they start and develop their arguments The appeal to Kant attempts to pave the way for a robust answer to the question of whether or not there is non conceptual content Since the incompatibility of the conceptualist and non conceptualist readings of Kant indicate a paradigm case hopes have risen that the answer to the question of whether Kant is a conceptualist or a non conceptualist might settle the contemporary controversy across the board This volume searches for that answer This book is based on a special issue of the International Journal of Philosophical Studies
