European Images of the Americas and the Classical Tradition Wolfgang Haase, Reinhold Meyer, 2011-08-02 No detailed description available for European Images of the Americas and the Classical Tradition Hierarchy, Commerce and Fraud in Bourbon Spanish America Ruth Hill, 2005 Using *El lazarrillo de ciegos caminantes* the Guide for Blind Rovers by Alonso Carrijo de Lavandera the best known work of the era as a jumping off point for a sprawling discussion of 18th century Spanish America Ruth Hill argues for a richer more nuanced understanding of the relationship between Spain and its western colonies Armed with primary sources including literature maps census data letters and diaries Hill reveals a rich world of intrigue and artifice where identity is surprisingly fluid and always in question More importantly Hill crafts a complex argument for reassessing our understanding of race and class distinctions at the time with enormous implications for how we view conceptions of race and class today **El-Hi Textbooks in Print**, 1975 Includes related teaching materials

Mapping Colonial Spanish America Santa Arias, Mariselle Meléndez, 2002 The essays inquire into the spatial configurations of colonial Spanish America and its inhabitants as they both relate to issues of alterity identity the economy of geographical representation gender and the construction of the colonial city The volume indicated a variety of essays dealing with different geographical regions including the centers of cultural production such as Mexico and Peru as well as marginalized colonial territories **The Cambridge History of Latin America** Leslie Bethell, 1984-12-06 This volume looks at the history of colonial Latin America The Indies of the Setting Sun Ricardo Padrón, 2020-07-29 Padrón reveals the evolution of Spain's imagining of the New World as a space in continuity with Asia Narratives of Europe's westward expansion often tell of how the Americas came to be known as a distinct landmass separate from Asia and uniquely positioned as new ground ripe for transatlantic colonialism But this geographic vision of the Americas was not shared by all Europeans While some imperialists imagined North and Central America as undiscovered land the Spanish pushed to define the New World as part of a larger and eminently flexible geography that they called *las Indias* and that by right belonged to the Crown of Castile and León *Las Indias* included all of the New World as well as East and Southeast Asia although Spain's understanding of the relationship between the two areas changed as the realities of the Pacific Rim came into sharper focus At first the Spanish insisted that North and Central America were an extension of the continent of Asia Eventually they came to understand East and Southeast Asia as a transpacific extension of their empire in America called *las Indias del poniente* or the Indies of the Setting Sun The Indies of the Setting Sun charts the Spanish vision of a transpacific imperial expanse beginning with Balboa's discovery of the South Sea and ending almost a hundred years later with Spain's final push for control of the Pacific Padrón traces a series of attempts both cartographic and discursive to map the space from Mexico to Malacca revealing the geopolitical imaginations at play in the quest for control of the New World and Asia Catalog of the Latin American Collection University of Texas at Austin.
