Imprint and Trace Sonja Neef, 2012-01-01 Today writing by hand seems a nearly archaic process Nearly all of our written communication is digital our letters are via email or text message our manuscripts are composed using word processors our journals are blogs and we sign checks to pay bills with the push of a button Sonja Neef believes that what we have lost in our modern technological conversation is the ductus the physical and material act of handwriting In Imprint and Trace Neef argues however that handwriting throughout its history has always been threatened with erasure It exists in a dual state able to be standardized repeated copied much like an imprint and yet persistently singular original and authentic as a trace or line Throughout its history from the first prehistoric handprint through the innovations of stylus quill and printing press handwriting has revealed an interweaving ever changing relationship between imprint and trace Even today in the age of the digital revolution the trace of handwriting is still an integral part of communication whether etched photographed pixelated or scanned Imprint and Trace presents an essential re-evaluation of the relationships between handwriting and technology and between the various imprints and traces that define communication

To the Letter Simon Garfield, 2013-11-14 The New York Times bestselling author of Just My Type and On the Map offers an ode to letter writing and its possible salvation in the digital age Few things are as exciting and potentially life changing as discovering an old letter And while etiquette books still extol the practice letter writing seems to be disappearing amid a flurry of e-mails texting and tweeting The recent decline in letter writing marks a cultural shift so vast that in the future historians may divide time not between BC and AD but between the eras when people wrote letters and when they did not So New York Times bestselling author Simon Garfield asks Can anything be done to revive a practice that has dictated and tracked the progress of civilization for more than five hundred years In To the Letter Garfield traces the fascinating history of letter writing from the love letter and the business letter to the chain letter and the letter of recommendation He provides a tender critique of

early letter writing manuals and analyzes celebrated correspondence from Erasmus to Princess Diana He also considers the role that letters have played as a literary device from Shakespeare to the epistolary novel all the rage in the eighteenth century and alive and well today with bestsellers like *The Guernsey Literary and Potato Peel Pie Society* At a time when the decline of letter writing appears to be irreversible Garfield is the perfect candidate to inspire bibliophiles to put pen to paper and create a form of expression emotion and tactile delight we may clasp to our heart
