assembled from 78 selected regular papers 45 additional short papers and 29 posters resulting in this volume of proceedings The program also included three invited plenary keynote presentations from Xilinx Gilder Technology Report and Altera and three embedded tutorials from Xilinx the Universit at Karlsruhe TH and the University of Oslo Communicating Process Architectures 2015 & 2016 K. Barnes,2018-10-04 This book presents the proceedings of two conferences the 37th and 38th in the WoTUG series Communicating Process Architectures CPA 2015 held in Canterbury England in August 2015 and CPA 2016 held in Copenhagen Denmark in August 2016 Fifteen papers were accepted for presentation at the 2015 conference They cover a spectrum of concurrency concerns mathematical theory programming languages design and support tools verification multicore infrastructure and applications ranging from supercomputing to embedded Three workshops and two evening fringe sessions also formed part of the conference and the workshop position papers and fringe abstracts are included in this book Fourteen papers covering the same broad spectrum of topics were presented at the 2016 conference one of them in the form of a workshop They are all included here together with abstracts of the five fringe sessions from the conference **Languages, Design Methods, and Tools for Electronic System Design** Rolf Drechsler,Robert Wille,2016-05-30 This book brings together a selection of the best papers from the eighteenth edition of the Forum on specification and Design Languages Conference FDL which took place on September 14 16 2015 in Barcelona Spain FDL is a well established international forum devoted to dissemination of research results practical experiences and new ideas in the application of specification design and verification languages to the design modeling and verification of integrated circuits complex hardware software embedded systems and mixed technology systems Design Methods and Applications for Distributed Embedded Systems Bernd Kleinjohann,Guang R. Gao,Hermann Kopetz,Lisa Kleinjohann,Achim Rettberg,2006-04-11 The IFIP TC 10 Working Conference on Distributed and Parallel Embedded Systems DIPES 2004 brings together experts from industry and academia to discuss recent developments in this important and growing field in the splendid city of Toulouse France The ever decreasing price performance ratio of microcontrollers makes it economically attractive to replace more and more conventional mechanical or electronic control systems within many products by embedded real time computer systems An embedded real time computer system is always part of a well specified larger system which we call an intelligent product Although most intelligent products start out as stand alone units many of them are required to interact with other systems at a later stage At present many industries are in the middle of this transition from stand alone products to networked embedded systems This transition requires reflection and architecting The complexity of the evolving distributed artifact can only be controlled if careful planning and principled design methods replace the hoc engineering of the first version of many standalone embedded products **System Verilog Golden Reference Guide** Doulos, *SystemVerilog Golden Reference Guide* ,2003 *SystemC Golden* ,2005 Modellierung von digitalen Systemen mit SystemC Frank Kesel,2012-10-18 Mit SystemC einer auf C aufbauenden
