

▲ This sanding table houses a blower and pleated filters that "scrub" the dust from the air as you sand. And the table doubles as a shop air cleaner.

▼ The table also makes a handy tool platform. Here short "feet" on the tool base extend only into the mat, providing a vibration-free mount.

dust-free downdraft SANDING TABLE

One of the best solutions I've seen to controlling dust in a shop is this downdraft sanding table. Based on a project idea sent to us by Peter Dulak of Red Wing, Minnesota, it captures the fine dust produced by a sander. Plus, it's a great air cleaner — even when you're not sanding a project.

The table houses a blower that draws air through a system of pleated filters (see illustration below). These filters remove the dust from the air, which is then exhausted to the shop.

For this particular downdraft table, we purchased a new blower. However,

a blower salvaged from an old furnace would also work well. As for the sanding surface, a rubber anti-fatigue mat (used as under-foot padding on concrete floors) provides a surface that grips the workpiece and keeps it from slipping. The mat is supported by a perforated sheet of plywood that allows air to pass through.

Case Construction — The case of this sanding table is constructed of $\frac{3}{4}$ " plywood panels. The dimensions of the panels shown here are for our blower and 12" x 24" filters. You'll want to have your blower and filters
