Indigenous Australians and the National Disability Insurance Scheme Nicholas Biddle, Fadwa Al-Yaman, Michelle Gourley, M Gray, J. R. Bray, B. Brady, L. A. Pham, E. Williams, M. Montaigne, 2014-10-28 The National Disability Insurance Scheme NDIS is one of the major policy innovations of the early 21st century in Australia representing a new way of delivering services to people with a disability and those who care for them It has the potential to transform the lives of hundreds of thousands of people giving them greater certainty and control over their lives There is a higher incidence of disability in the Aboriginal and Torres Strait Islander population than in the Australian population more generally so the NDIS is of particular relevance to Indigenous Australians However Indigenous Australians with a disability have a very distinct age geographic and health profile which differs from that of the equivalent non Indigenous population Furthermore the conceptualisation of disability and care in many Indigenous communities particularly in remote areas may differ markedly in comparison to more settled parts of the country and there is the added complexity of a unique history of interaction with government In considering these issues in detail this Research Monograph provides a resource for policy makers researchers and service providers who are working in this important policy area Its major conclusion is that the NDIS if it is to be an effective policy for Indigenous Australians needs to take into account their very particular needs and aspirations **Federal Register** ,1992-03-24 [TV Guide](#) ,2006 **Space Strategy and Military Doctrine** Bert

Chapman, 2025-07-24 Examining open access civilian and military space policy strategy and doctrine documents this book highlights emerging trends and developments in military space strategy Bert Chapman collects public documents from Australia Canada the European Union NATO the United States and the United Kingdom from 2017 onward to illustrate space

s critical importance to national and international security and to multiple areas of civilian economic and personal use including climate change food security personal and global communications and the potential for expanded space exploration In light of recent revelations that Russia may be capable and desirous of exploding nuclear weapons in space to damage civilian and military space based infrastructures of the U S and other countries and China s increasing space assertiveness and capabilities it is more important than ever that civilian readers have the access and background knowledge necessary to parse publicly available documents relating to space strategy so that they may effectively participate in the legislative and regulatory policymaking processes of their governments
