**Revival: Military Intervention and Peacekeeping: The Reality (2001)** Richard

Connaughton, 2017-09-08 This title was first published in 2001 This work represents the author's writing and thinking over the last decade on the subject of military intervention and peacekeeping He deconstructs what has been developed under the auspices of UN peacekeeping with a view to producing a new paradigm more appropriate to the challenges of the 21st century This is not an exercise in disparaging the UN the organization's achievements are recognized along with its prevalent habit of entering environments it has neither the resources or expertise to manage The first four chapters establish a foundation built upon philosophy doctrine definitions principles and decision making processes This thinking is then tested using scenarios drawn from Iraq Somalia Rwanda Kosovo East Timor and Sierra Leone The book is founded on theory and practice and it is particularly intended to explain the conduct of the political and military processes involved in military intervention and peacekeeping

*Moral Victories* Andrew R. Hom, Cian O'Driscoll, Kurt Mills, 2017-11-17 What does it mean to win a moral victory Ideals of just and decisive triumphs often colour the call to war yet victory is an increasingly dubious proposition in modern conflict where negotiated settlements and festering violence have replaced formal surrenders In the Just War and strategic studies traditions assumptions about victory also underpin decisions to go to war but become more problematic in discussions about its conduct and conclusion So although winning is typically considered the very object of war we lack a clear understanding of victory itself Likewise we lack reliable resources for discerning a just from an unjust victory for balancing the duty to fight ethically with the obligation to win and for assessing the significance of changing ways of war for moral judgment Though not amenable to easy answers these important questions are both perennial and especially urgent This book brings together a group of leading scholars from various disciplines to tackle them It covers both traditions of victory charting the historically variable notion of victory and the dialogues and fissures this opens in the just war and strategic canons along with contemporary challenges of victory analysing how new security contexts put pressure on these fissures and working toward clearer ideas about victory today The result is a wide ranging and timely collection of essays that bridges the gap between ethical strategic and historical approaches to war and develops new ways of thinking about it as a practical and moral proposition
