Experiments In General Chemistry Sixth 6th Edition:

Experiments in General Chemistry Steven L. Murov, 2014-01-01 EXPERIMENTS IN GENERAL CHEMISTRY Sixth Edition has been designed to stimulate curiosity and insight and to clearly connect lecture and laboratory concepts and techniques To accomplish this goal an extensive effort has been made to develop experiments that maximize a discovery oriented approach and minimize personal hazards and ecological impact Like earlier editions the use of chromates barium lead mercury and nickel salts has been avoided The absence of these hazardous substances should minimize disposal problems and costs This lab manual focuses not only on what happens during chemical reactions but also helps students understand why chemical reactions occur The sequence of experiments has been refined to follow topics covered in most general chemistry textbooks In addition Murov has included a correlation chart that links the experiments in the manual to the corresponding chapter topics in several Cengage Learning general chemistry titles Each experiment framed by pre and post laboratory exercises and concluding thought provoking questions helps to enhance students conceptual understanding Important Notice Media content referenced within the product description or the product text may not be available in the ebook version

Teratogens V. Kolb Meyers, 1988-01-01 This multi author work deals with the practical aspects of teratogens chemicals which cause birth defects It is designed for use as a unique guide to these chemicals in which one can find all relevant information The issues covered include how to obtain information about the teratogenic potential of chemicals teratogenic chemicals in undergraduate chemistry laboratories safe handling of teratogenic chemicals teratogenicity of pesticides and other pollutants in the environment occupational exposure and pregnancy outcome identification and prevention of reproductive hazards in industry and the long term effects of chemicals on the developing brain A list of approximately 5 000 chemicals known to cause reproductive effects is given A comprehensive bibliography is included with each chapter providing up to date references for more in depth coverage The monograph will be of interest to academic and industrial chemists health professionals as well as both undergraduate and graduate students in health and related sciences
