

Microsoft Access

Microsoft Access is a database management system (DBMS) that allows you to create and manage databases. It is part of the Microsoft Office suite and is used to store and organize data. Access can be used to create databases for a wide range of applications, from simple contact lists to complex business systems. It includes tools for creating tables, queries, forms, and reports. Access also provides a security framework to protect your data. The Access database engine is a client-server architecture that allows multiple users to access the same database simultaneously. Access is available on Windows and macOS operating systems.
