Experts And Consensus In Social Science Ethical Economy:

Experts and Consensus in Social Science Carlo Martini, Marcel Boumans, 2014-09-11 This book brings together the research of philosophers sociologists and social scientists It examines those areas of scientific practice where reliance on the subjective judgment of experts and practitioners is the main source of useful knowledge to address and possibly bring solutions to social problems A common phenomenon in applications of science is that objective evidence does not point to a single answer or solution to a problem Reliance on subjective judgment then becomes necessary despite the known fact that hunches even those of putative experts often provide information that is not very accurate and that experts are prone to fallacies and biases The book looks at how experts reach consensus in the social sciences and which experts are relevant to which problems It aims to answer many questions the main one being Can we start building a normative theory of expertise on the basis of the evidence that social scientists sociologists and philosophers have uncovered

Decolonial Narratives in Economics Altuğ Yalçıntaş, Arne Heise, 2025-01-09 What narratives are underrepresented in the history of economic thought How do economists account for freedom justice and democracy in non Western cultures How are ideas in non English speaking countries disseminated This book answers these critical questions with contributions by authors from underrepresented backgrounds within economics

Reinventing Society with Philosophy, Religion, and Science Neil Wollman, Carolyn J. Love, 2023-02-06 What might a society that utilizes the valuable insights from the perspectives of philosophy religion and social science look like This volume examines these principles to improve our social institutions from education social welfare government and criminal justice to the economy The contributors apply their knowledge in a hands on practical way making this book accessible to teachers police officers social workers economists congressional legislators and undergraduates Professors and students across all these areas will find a real world application of their subjects Those who think big picture about society or have a general interest in philosophy religion or social science will find ideas here that will spark their imagination and perhaps action

The Oxford Handbook of Philosophy of Political Science Harold Kincaid, Jeroen Van Bouwel, 2023 The Oxford Handbook of Philosophy of Political Science brings together philosophers of science and political scientists to discuss philosophical issues in political science The book offers twenty seven essays on how to do research in political science the purposes and use of political science in society as well as how to evaluate claims made by political scientists

Genetically Modified and non-Genetically Modified Food Supply Chains Yves Bertheau, 2012-09-10 In the European Union nations and other countries including Japan Australia and Malaysia it is a legal requirement that food products containing genetically modified organism GMO materials are labelled as such in order that customers may make informed purchasing decisions For manufacturers and consumers to be confident about these assertions systems must be in place along the entire food chain which support the co existence of GM and non GM materials whilst maintaining a strict segregation between the two This book is an output of a European Union funded project entitled

Co Extra GM and non GM food and feed supply chains their Co Existence and Traceability The objective of this four year project is to provide practical tools and methods for implementing co existence that will enable the co existence of genetically modified GM and non GM crops enable the segregation and tracing of genetically modified organism GMO materials and derived products along the food and feed chains anticipate the future expansion of the use of GMOs The project is designed to foster a robustly science based debate amongst all of the stakeholders involved in the food and feed chains and the tools will be assessed not only from a technical point of view but with regard to the economic and legal aspects It also surveys the GMO related legal regimes and practices that exist in and beyond the EU This book examines the practical tools and methods available to implement the co existence and traceability of GM and non GM food materials along the entire food and feed chains as demanded by consumers and by legislation in force in the EU and elsewhere GM and Non GM Supply Foods is a source of valuable information for food manufacturers food research institutions and regulatory bodies internationally

Law, Practice and Politics of Forensic DNA Profiling Victor Toom, Matthias Wienroth, Amade M'charek, 2022-12-30 This collection reviews developments in DNA profiling across jurisdictions with a focus on scientific and technological developments as well as their political ethical and socio legal aspects Written by leading scholars in the fields of social studies of forensic science science and technology studies and socio legal studies the book provides state of the art analyses of forensic DNA practices in a diverse range of jurisdictions new and emerging forensic genetics technologies and issues of legitimacy The work articulates the various forms of technolegal politics involved in the everyday standardised and emerging practices of forensic genetics and engages with the most recent scholarly and policy literature In analyses of empirical cases and by taking into account the most recent technolegal developments the book explores what it means to live in a world that is increasingly governed through anticipatory crime control and its related risk management and bio surveillance mechanisms which intervene with and produce political and legal subjectivities through human bodies in their DNA This volume is an invaluable resource for those working in the areas of social studies of forensic science science and technology studies socio legal studies sociology anthropology ethics law politics and international relations

Science & Public Policy, 2005 **Economics and Climate Emergency** Barry Gills, Jamie Morgan, 2022-08-22 This book explores a series of connected themes focused on the role economics and other influential forms of theory and thinking have played in creating the current predicament and the scope for alternatives and how they might be framed Thirty years have passed since the inception of the United Nations Framework Convention on Climate Change UNFCCC and the beginning of policy on climate change Thirty wasted years To most politicians long term collective interest has been denominated in meaningless units of time a never and forever that has continually delayed action From complacency has come potential disaster and we are now living in a time of climate emergency and ecological breakdown The next decade is a pivotal period requiring fundamental change But numerous impediments remain Continual material energy and economic growth on a planetary scale

are manifestly impossible and yet economic theory takes these as a given and political leadership and policy seem unwilling to accept brute reality. Instead they offer a series of implausible commitments and pledges rooted in technofixes without addressing the fundamental drivers of the problems the world faces. The edited volume explores the issues and offers a variety of ways to think through the problems at hand from postgrowth degrowth and social ecological economics to policy assemblage and transversalism. The chapters in this book were originally published in the journal *Globalizations*. **Trust and Infrastructure in Scholarly Communications** Daniel W. Hook, Linda Suzanne O'Brien, Stephen Pinfield, 2023-01-06

International Social Science Journal, 2009 *Technology Innovation and Its Relations to Humanities and Social Sciences* □□□□, Lee Ki-Jun, 2003-03 **Sociological Abstracts** Leo P. Chall, 2001 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences. The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books, book chapters, dissertations, and conference papers. Public Understanding of Science, 2007 An international journal of research in the public dimensions of science and technology. *Social Sciences Index*, 2001 The American Monthly Review of Reviews Albert Shaw, 1907 **Ethics and Economic Theory** Kurt Wilhelm Rothschild, 1993 This distinguished book provides a critical assessment of the relationship between economic theory, scientific objectivity, and ethics. The main purpose of economic science is to analyse and explain the economic process but not necessarily to pass judgement as to whether this process is good or bad. However, in practice it is very difficult for the economist to study the laws of economics without ever touching ethical questions. It is shown that economic theories, despite avowals of scientific objectivity, contain implicitly or explicitly many aspects which have ethical implications. Making extensive use of real life examples and offering a new perspective on the ethical dimensions of economic analysis, this book will prove essential reading for economists and philosophers alike. *Computer Applications in the Social Sciences* Edward E. Brent, Ronald E. Anderson, 1990 **Bulletin of the Public Affairs Information Service** Public Affairs Information Service, 1983 **The American Monthly Review of Reviews**, 1907 **American Monthly Review of Reviews** Albert Shaw, 1907
