## Explorations In Pragmatic Economics:

Explorations in Pragmatic Economics George A. Akerlof, 2005-03-17 For twenty years since the publication of his seminal paper *The Market for Lemons* George A. Akerlof's work has changed the way we see economics and the economics of information in particular. In abandoning the perfect competition benchmarks of classical economics the pragmatic modern economics championed by Akerlof has provided deep insights into markets, identity, discrimination, motivation, and work, and into behavioural economics in general. This collection of Akerlof's most important papers provides both an introduction to Akerlof's work and a grounding in modern economics. Divided into two broad areas, micro and macroeconomics, they cover the economics of information, the theory of unemployment, macroeconomic equilibria, the demand for money, psychology, and economics and the nature of discrimination and other social issues. The collection closes with Akerlof's 2001 Nobel Lecture in which he argues that it is imperative that macroeconomics be considered inherently behavioural. Akerlof's substantial introduction to this volume tells the story of these papers, connecting them and showing how his later work has built upon his early contributions, in many cases improving their arguments, their subtlety, and their usefulness today. *Explorations in Pragmatic Economics* George A. Akerlof, 2023 A valuable collection of papers illustrating Akerlof's modern Nobel Prize winning methodology at work. This volume covers the economics of information, the theory of unemployment, the demand for money, psychology, and economics and the nature of discrimination. *Functional Approach to Professional Discourse* *Exploration in Linguistics* Elena N. Malyuga, 2019-08-06 This book presents research into various types of professional discourse through the prism of the functional linguistics approach. Focusing mainly on practical aspects of speech, the book discusses various topics such as structural, semantic, cognitive, and pragmatic characteristics of professional discourse, argumentation strategies, humour in professional discourse, and word building processes. It also highlights communicative effectiveness methods in professional discourse. Offering new ideas and discussing the latest findings, the book is intended for researchers, lecturers, and professionals in the field. **The American Economic Review**, 1918 *Pathways to Exploration* National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Division on Engineering and Physical Sciences, Space Studies Board, Aeronautics and Space Engineering Board, Committee on Human Spaceflight, 2014-09-30 The United States has publicly funded its human spaceflight program on a continuous basis for more than a half century through three wars and a half dozen recessions, from the early Mercury and Gemini suborbital and Earth orbital missions to the lunar landings and thence to the first reusable winged crewed spaceplane that the United States operated for three decades. Today the United States is the major partner in a massive orbital facility, the International Space Station, that is becoming the focal point for the first tentative steps in commercial cargo and crewed orbital space flights. And yet the long term future of human spaceflight beyond this project is unclear. Pronouncements by multiple presidents of bold new ventures by Americans to the Moon, to Mars, and to an asteroid in its native orbit have not

been matched by the same commitment that accompanied President Kennedy's now fabled 1961 speech namely the substantial increase in NASA funding needed to make it happen Are we still committed to advancing human spaceflight What should a long term goal be and what does the United States need to do to achieve it Pathways to Exploration explores the case for advancing this endeavor drawing on the history of rationales for human spaceflight examining the attitudes of stakeholders and the public and carefully assessing the technical and fiscal realities This report recommends maintaining the long term focus on Mars as the horizon goal for human space exploration With this goal in mind the report considers funding levels necessary to maintain a robust tempo of execution current research and exploration projects and the time resources needed to continue them and international cooperation that could contribute to the achievement of spaceflight to Mars According to Pathways to Exploration a successful U S program would require sustained national commitment and a budget that increases by more than the rate of inflation In reviving a U S human exploration program capable of answering the enduring questions about humanity's destiny beyond our tiny blue planet the nation will need to grapple with the attitudinal and fiscal realities of the nation today while staying true to a small but crucial set of fundamental principles for the conduct of exploration of the endless frontier The recommendations of Pathways to Exploration provide a clear map toward a human spaceflight program that inspires students and citizens by furthering human exploration and discovery while taking into account the long term commitment necessary to achieve this goal Journal of Economic Literature ,2007 *Exploration and Economics of the Petroleum Industry* ,1973 **Adbusters** ,2009 **Economic and Political Weekly** ,2006
