Overview

Despite talk of early signs of economic recovery in the country, the period under review remained challenging for retailers. Pessimistic consumer sentiment prevailed in an environment featuring continued high levels of unemployment and indebtedness, limited real wage increases, and consumer spend pressured by rising power and fuel costs and widespread food inflation.

In this broad economic context, the food services sector experienced a range of discernible new trends, most apparent of which was unprecedented fragmentation, reflected by aggressive price cutting and promotional activities; divergence by established brands from traditional core menu offerings; entry into unrelated categories; and portion size re-engineering. Additional pressure was exerted by traditional retailers attempting to gain market share from conventional convenience-centred food services operators. Significantly, whilst the number of consumers increased across the food services category, the frequency of visits declined by 10% to their lowest level in twelve years, and in line with 2005.

Notwithstanding these testing conditions, Famous Brands has delivered creditable results for the year ended 29 February 2012, achieved through intensified focus and improvements in the front and back ends of the business.

Financial results

Following a phase of intense acquisitive growth in the past two years, the Group undertook to focus on consolidating and integrating its new businesses, a programme which has been concluded and is reflected in the improvements in revenue and profitability of the Franchising and Supply Chain divisions.

Group revenue and operating profit grew by 15% to R2,16 billion (2011: R1,88 billion) and R413 million (2011: R358 million) respectively. The operating margin remained steady at the record level of 19,1% achieved in the prior comparative period.

Net interest paid decreased 29% to R11 million (2011: R15 million) due to reduced net borrowings arising from sustained strong cash flows and the prevailing low interest rate environment.

The Group's tax rate increased to 33,3% (2011: 32,8%) in the reporting period due mainly to the impact of the increased capital gains tax rate on deferred tax balances. This was significantly offset by prior year tax adjustments.

Headline earnings per share and earnings per share both increased by 15% to 278 cents per share.

Cash generated from operations before changes in working capital increased by 15% to R452 million (2011: R392 million). After changes in working capital, cash generated from operations amounted to a healthy R399 million (2011: R397 million). Tax payments of R132 million were 6% up on the prior year. Capital expenditure of R88 million was incurred and comprised mainly R31 million for the acquisition of the Milky Lane and Juicy Lucy trademarks on 1 March 2011 as well as Supply Chain expansion activities. These included R18 million for the chicken fillet plant in the Manufacturing Division and R6 million for a new Logistics depot in Nelspruit which commenced deliveries in April 2012. After payment of R159 million (2011: R128 million) in dividends, cash flows were sufficient to pay down net borrowings by R19 million (2011: R58 million). The low level of borrowings, net of cash and bank balances, of R82 million (2011: R101 million) represents a mere 10% of equity (2011: 14%), affording ample scope to grow the business organically or by acquisition.

Operational reviews

FRANCHISING DIVISION – LOCAL

The Local Franchising division, which comprises operations in South Africa and 15 African countries, reported a satisfactory performance in an extremely competitive environment. In South Africa system-wide sales across the brand portfolio increased by 8%, while like-on-like sales grew 5%; the Group's African market improved system-wide and like-on-like sales by 21% and 7% respectively. Combined revenue for the South African and African operations increased 14% to R440 million (2011: R386 million), whilst operating profit in this division rose 13% to R265 million (2011: R235 million). The operating profit margin was 60,2% compared with 60,9% in the prior year, slightly lower, effectively a function of investing in newly acquired and developing brands in advance of royalty collections.

The Group surpassed its 2 000 restaurant milestone, opening a total of 146 new restaurants during the year (2011: 111), 113 of them in South Africa and the balance of 33 in Africa; the latter achievement is a reflection of Famous Brands' success in gaining traction in the region. In addition, 99 restaurants were revamped (2011: 81), 92 of them in South Africa and the balance in Africa.

Once again the Group's brands were acknowledged by loyal consumers via the annual consumer survey, Leisure Options, achieving a clean sweep of awards across all major categories in which the Group's brands compete.

Gelos,Deniz Igan,Ms. Deniz O Igan,Maria Martinez Peria,Mr. Maria Soledad Martinez Peria,Erlend Nier,Mr. Fabian Valencia,2023-03-31 The global financial crisis GFC underscored the need for additional policy tools to safeguard financial stability and ultimately macroeconomic stability Systemic financial vulnerabilities had developed under a seemingly tranquil macroeconomic surface of low inflation and small output gaps This challenged the precrisis view that achieving these traditional policy targets was a sufficient condition for macroeconomic stability Thus new tools had to be deployed to target specific financial vulnerabilities and to build buffers to cushion adverse aggregate shocks while allowing traditional policy levers including monetary and microprudential policies to focus on their traditional roles Macroprudential policy measures emerged as the solution to this gap Some of these measures had been used before the GFC mostly in emerging markets But it was only after the crisis that they were more widely adopted and the toolkit expanded This spurred a growing body of empirical research on the effects and potential shortfalls of these measures with a further deepening of this knowledge gaining importance as policymakers confront increased financial stability risks in the post pandemic world Recognizing that there still is much to learn this paper takes stock of our expanding understanding

Style and the Future of Composition Studies Paul Butler,Brian Ray,Star Medzerian Vanguri,2020-11-02

Style and the Future of Composition Studies explores style s potential for informing how students are taught to write well and its power as a tool for analyzing the language and discourse practices of writers and speakers in a range of contexts Many college writing teachers operate under the belief that style still refers primarily to the kinds of issues discussed in Strunk and White s popular but outdated book *The Elements of Style* This work not only challenges this view but also offers theories and pedagogies from diverse perspectives that help teachers and students develop strategic habits and mindsets to negotiate languages genres and discourse conventions The chapters explore the ways in which style directly affects and is affected by multiple sources of shifting disciplinary inquiry contributing new insights by drawing on research in cultural studies sociolinguistics discourse studies translingualism and writing across the curriculum as well as new approaches to classical rhetorical theory The reemergence of stylistic inquiry can be used dynamically to produce new insights not only about emerging disciplinary interests but also about the study of style as a kind of language in and of itself

Style and the Future of Composition Studies demonstrates that style deserves to be a central focus of writing teaching More than just the next style collection the book advocates for style s larger prominence in composition discussions generally It will be of interest to a broad range of students and scholars of writing studies as well as a wider set of readers in academe
