Exotic Preferences Behavioral Economics And Human Motivation:

Exotic Preferences George Loewenstein, 2007-08-02 George Loewenstein is one of the pioneers of the rapidly growing field of behavioral economics. For over twenty years he has been working at the intersection of economics and psychology and is one of the few people of whom it can be said that their work is equally respected and well known within both disciplines. This book brings together a selection of his papers focusing on what he calls exotic preferences: the disparate motives that drive human behavior. In addition to covering the history and methodology of behavioral economics, they also touch on a wide range of fascinating topics such as the motives that drive extreme athletes, our propensity to want to get unpleasant experiences out of the way so we can focus on the more pleasant, and the psychology of curiosity. There are also papers on social preferences, discussing the importance of perceptions of fairness in interpersonal interactions, intertemporal choice, the tradeoffs between costs and benefits occurring at different points in time, and the impact of emotion on economic decision making. An original introduction outlines Loewenstein's general approach to research, and there are short introductions to each paper, outlining briefly when and why they came to be written, providing a fascinating and vivid insight into the process of intellectual creativity.

Progressive Leadership Greg Park, 2022-03-21 Progressive Leadership addresses the diminishing and increasingly dysfunctional contribution of firm leadership in the operational effectiveness, performance, and survival of the firm in the business context of the twenty-first century.

Behavioural Economics and Finance Michelle Baddeley, 2013 Standard models in economics and finance usually assume that people are rational, self-interested maximisers effectively coordinated via the invisible hand of the price mechanism. Whilst these approaches produce tractable, simple models, they cannot fully capture the uncertainties and instabilities that affect everyday choices in today's complex world. Insights from the other social and behavioural sciences can help to fill the gap, and behavioural economics is the subject which brings economics and finance together with psychology, neuroscience, and sociology. *Behavioural Economics and Finance* introduces the reader to some of the key concepts and insights from this rich interdisciplinary approach to real-world decision making.

The Foundations of Behavioral Economic Analysis Sanjit Dhami, 2019-02-14 Taken from the first definitive introduction to behavioral economics, *The Foundations of Behavioral Economic Analysis* is an authoritative and cutting-edge guide to this essential topic for advanced undergraduate and postgraduate students. It considers the evidence against the exponential discounted utility model and describes several behavioral models, such as hyperbolic discounting, attribute-based models, and the reference time theory. This updated extract from Dhami's leading textbook allows the reader to pursue subsections of this vast and rapidly growing field and to tailor their reading to their specific interests in behavioural economics.

To Flourish or Destruct Christian Smith, 2015-03-23 A study of what motivates humans and the activity that gives rise to human social life and social

structures In his 2010 book *What Is a Person* Christian Smith argued that sociology had for too long neglected this fundamental question Prevailing social theories he wrote do not adequately capture our deep subjective experience as persons crucial dimensions of the richness of our own lived lives what thinkers in previous ages might have called our souls or hearts Building on Smith's previous work *To Flourish or Destruct* examines the motivations intrinsic to this subjective experience Why do people do what they do How can we explain the activity that gives rise to all human social life and social structures Smith argues that our actions stem from a motivation to realize what he calls natural human goods ends that are by nature constitutionally good for all human beings He goes on to explore the ways we can and do fail to realize these ends a failure that can result in varying gradations of evil Rooted in critical realism and informed by work in philosophy psychology and other fields Smith's ambitious book situates the idea of personhood at the center of our attempts to understand how we might shape good human lives and societies Praise for *To Flourish or Destruct* This major work in sociology theory should be read by social scientists in all disciplines Highly recommended Choice *To Flourish or Destruct* poses a powerful and important challenge to the entire discipline of sociology Smith is becoming the anchor of a humanist renewal in sociology and although he is not alone in this movement what makes *To Flourish or Destruct* different is a coherent new oppositional perspective that draws on critical realism to affirm both human personhood and the ever present moral element in human affairs Smith's Personalism could become the banner around which a very different kind of sociology develops one that respects the centered consciousness that is human personhood Douglas Porpora Drexel University This book represents a major advance in sociology and more specifically within critical realism which is gradually emerging as a full fledged alternative in the social sciences I am fundamentally convinced by this book George Steinmetz University of Michigan *Symposium*, 2008 **Bibliographie Mensuelle** United Nations Library (Geneva, Switzerland), 2010 The Journal of Home Economics, 1970 **Entomology Abstracts**, 1994 Monthly with annual author and subject indexes Abstracts from about 2750 primary journals dealing with the subject of insects Arranged in classified order Entries include titles given or translated into English authors addresses offirst authors and abstracts all insects cited in the abstracts are identified by scientific family names Each monthly issue has Index to classes and orders Author index *Moral Dimension* Amitai Etzioni, 1990-06-15 Condemning a society guided solely by economic self interest the author argues for the establishment fo socioeconomics a system that would utilize broader moral and social concerns to regulate economic behavior **Ecology Abstracts**, 1994 Coverage 1982 current updated monthly This database covers current ecology research across a wide range of disciplines reflecting recent advances in light of growing evidence regarding global environmental change and destruction Major ares of subject coverage include Algae lichens Animals Annelids Aquatic ecosystems Arachnids Arid zones Birds Brackish water Bryophytes pteridophytes Coastal ecosystems Conifers Conservation Control Crustaceans Ecosyst em studies Fungi Grasses Grasslands High altitude environments Human ecology Insects
