Progress in Expert Systems Research Ari P. Lipshitz,2007 An expert system also known as a knowledge based system is a computer program that contains some of the subject specific knowledge of one or more human experts This class of program was first developed by researchers in artificial intelligence during the 1960s and 1970s and applied commercially throughout the 1980s The most common form of expert systems is a program made up of a set of rules that analyse information usually supplied by the user of the system about a specific class of problems as well as providing mathematical

analysis of the problem s and depending upon their design recommend a course of user action in order to implement corrections It is a system that utilises what appear to be reasoning capabilities to reach conclusions This volume presents important new research from around the globe
