the scoring process After a careful review the Education Commissioner announced that there did appear to be a problem in the scoring of the test and a rescaling of the 3rd Grade FCAT reading exam would be forthcoming This admission by the State while honorable and praiseworthy opened the door for many to question other aspects of the FCAT test sometimes without just cause While it is clearly unfair to discount the overall precision and usefulness of the FCAT some form of careful review of scores is nonetheless proper The search for the same kind of irregular trends in the data that brought this type of problem to the surface is always warranted and should be welcomed Any abnormalities revealed in the examination of the scores need to be made public so that the need for in depth analysis can be considered It is in that spirit that this paper presents some unusual patterns in the data for FCAT Reading at the middle school level
