Featherweights Light Mobile And Floating Architecture Architecture In Focus:

Featherweights Oliver Herwig, 2003 From Bruno Taut's glass house to the Crystal Palace geodesic domes to the Millennium Dome this lavishly illustrated exploration of lightness in architecture explains how and why the movement began and shows where it will take us in the future Architecture has been moving towards lightness since the beginning of the twentieth century As new building materials become available and as land disappears architects have focused on efficiency impermanence and flexibility in structures Illustrating the achievements of the most visionary architects of the past and present Featherweights traces the evolution of lightness in architecture from the fantastic glass structures of the early twentieth century to the latest hi tech materials for the third millennium Covering everything from pre fab houses to inflatable buildings utopian architecture to virtual cities this fascinating exploration illustrates the ongoing dialogue between shelter and society and offers exciting glimpses into a future in which gravity is optional **Critical Regionalism** Liane Lefaivre, Alexander Tzonis, 2003 This richly illustrated and designed book in the Architecture in Focus series reconsiders critical regionalism and demonstrates the global viability of one of the most visible trends in contemporary architecture As globalization increasingly enters every facet of our lives its homogenizing effects on architecture urban spaces and the landscape have compelled architects to embrace the principles of critical regionalism an alternative theory that respects local culture geography and climate In this reexamination of critical regionalism two prominent architectural critics argue for a truce between the seemingly antithetical philosophies of critical regionalism and globalization The authors trace the genesis of critical regionalism to its ancient historical and political roots and focus on its modern expression in the works of Alvar Aalto Richard Neutra Oscar Niemeyer and others They point to the increasing use of the theory in the recent works of a truly global selection of visionary architects including Santiago Calatrava in Spain Renzo Piano in the South Pacific and Berger and Parkkinen in Germany Discussions of Tropical Architecture and contemporary work in Asia round out this important contribution to a topical debate about architecture's role in the world Amazon *Library Journal*, 2003 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately **American Book Publishing Record**, 2004 *The British National Bibliography* Arthur James Wells, 2003 *De Architect*, 2004 *Der Baumeister*, 2003-07 **Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen**, 2003 **Forthcoming Books** Rose Arny, 2003-04 **Floating Architecture** Horst Stopp, Peter Strangfeld, 2017 Floating architecture is not only an issue for luxurious tourism but with the climatic change the building of floating structures becomes relevant for many areas in the world In regions with rising sea levels frequent flooding or thawing permafrost floating structures can be a solution to adapt existing settlement areas to these new conditions The self sufficient energy and supply systems required for floating settlements can also be used in rural areas with a lot of migration This collection
