Modern world sets lots of problems for human beings and every time it is a considerable challenge for the mankind to try to solve this or that problem. One of these problems is the issue of gender inequality that troubles people a lot because touches every single person. But, to be true, this very gender problem is not the point of today, it appeared many centuries ago. The humankind developed together with this problem, attitudes towards it changed throughout the course of centuries but the problem itself did not disappear.

From the earliest times of human history people paid their attention to the inequality of men and women and, of course, both sides treated this issue differently. The history of human beings knew the periods when matriarchal societies existed, as well as patriarchal ones. Sometimes, this depended upon the epoch this society existed in, sometimes upon the culture of this or that nation. But, in any case, when one sex started to dominate another one would always claim that it was suppressed. Even nowadays matriarchal societies can be found, especially in the countries of Asia, where the power of women is doubtless.

The book that is to be considered in this critical essay is dedicated to the problem of gender inequalities, and namely feminism and its relation to religions of the world, their interaction and impact upon each other. This is the book by a prominent American writer Rita M. Gross called “Feminism and Religion: The Introduction”. The author of the book is widely known as a feminist and religious writer whose views arise a lot of controversy but are supported by the majority of activists of women rights movements in her country and abroad. Rita M. Gross is acknowledged as an expert in the fields of religion, especially Buddhism, and feminism, so her point of view in these issues, which she tried to express in her book, must be thoroughly considered.

The book “Feminism and Religion: The Introduction” was first published in 1996 and has become a real masterpiece of feminist literature since that time. It concerns the most important points of the interrelations between religion and feminism, as well as between them both and an academic subject of religious studies. The role of women in

Gender, Religion and Diversity Ursula King, Tina Beattie, 2005-12-01. *Gender, Religion and Diversity* provides an introduction to some of the most challenging perspectives in the contemporary study of gender and religion. In recent years, women's and gender studies have transformed the international study of religion through the use of interdisciplinary and cross-cultural methodologies which have opened up new and highly controversial issues, challenging previous paradigms and creating fresh fields of study. As this book shows, gender studies in religion raises new and difficult questions about the gendered nature of religious phenomena, the relationship between power and knowledge, the authority of religious texts and institutions, and the involvement and responsibility of the researcher undertaking such studies as a gendered subject. This book is the outcome of an international collaboration between a wide range of researchers from different countries and fields of religious studies. The range and diversity of their contributions is the very strength of this book, for it shows how gendering works in studying different religious materials, whether foundational texts from the Bible or Koran, philosophical ideas about truth, essentialism, history, or symbolism, the impact of French feminist thinkers such as Irigaray or Kristeva, or again critical perspectives dealing with the impact of race, gender, and class on religion, or by deconstructing religious data from a postcolonial critical standpoint, or examining the impact of imperialism and orientalism on religion and gender.

Theory of Women in Religions Catherine Wessinger, 2020-12-01. An introduction to the study of women in diverse religious cultures. While women have made gains in equality over the past two centuries, equality for women in many religious traditions remains contested throughout the world. In the Roman Catholic Church and the Church of Jesus Christ of Latter-day Saints, women are not ordained as priests. In areas of Pakistan and Afghanistan under Taliban occupation, girls and women students and their teachers risk their lives to go to school. And in Sri Lanka, fully ordained Buddhist nuns are denied the government identity cards that recognize them as citizens. Is it possible to create families, societies, and religions in which women and men are equal? And if so, what are the factors that promote equality? *Theory of Women in Religions* offers an economic model to shed light on the forces that have impacted the respective statuses of women and men from the earliest developmental stages of society through the present day. Catherine Wessinger integrates data and theories from anthropology, archaeology, sociology, history, gender studies, and psychology into a concise history of religions, an introduction to the complex relationships between gender and religion. She argues that socio-economic factors that support specific gender roles in conjunction with religious norms and ideals have

created a gendered division of labor that both directly and indirectly reinforces gender inequality Yet she also highlights how as the socio economic situation is changing religion is being utilized to support the transition toward women s equality noting the ways in which many religious representations of gender change over time

Methodology in Religious Studies

Arvind Sharma,2012-02-01 Methodology in Religious Studies assesses the impact of women s studies on the various methods employed in studying religion Since its inception in the 1860s the study of religion as an academic discipline has evolved over time ranging from the classically historical to the boldly hermeneutical The women s studies movement has since the 1980s become part and parcel of the intellectual landscape of our times and the study of religion has become increasingly influenced by it What are the implications of this new development for the methodology of religious studies Leading practitioners of psychological theological sociological anthropological phenomenological historical and hermeneutic approaches examine the mutually enriching interface between religious studies and women s studies as they explore the broader issue of the interaction between method and the nature of the subject itself
