COMPACT ANALOG
FIRE ALARM CONTROL PANEL

DESCRIPTION

The FCI 7200 Micro fire alarm control panel effectively combines multiprocessor analog system advantages with a compact design. Designed for commercial, industrial and institutional use, the 7200 Micro compact control panel is ideal for life safety applications.

This analog fire alarm control panel provides two (2) signaling line circuits, each capable of addressing 99 analog sensors and 98 monitor and/or control points for a total of 197 points per circuit, with a system maximum of 394 points.

Auto-configuration and/or computer programming allow the 7200 Micro to rapidly adapt to continuously changing environments. The integral COMPARE Program confirms any programmed system with proposed software modifications prior to downloading, affording software validation and minimized system retesting.

The 7200 Micro features sophisticated circuitry and powerful analog software enabling it to read specific (default/user) sensitivity levels of each sensor and compensate for any changes due to age or environmental conditions.

The 7200 Micro incorporates the FCI Listed Integrated Sensitivity Testing (LIST) which meets the NFPA 72 sensitivity testing and maintenance requirements. The LIST testing saves substantial time and money in both maintenance and service while virtually eliminating unwanted alarms.

The switching technology power limited power supply operates on either 120 or 240VAC, 50/60 Hz and is capable of maintaining batteries from 7 to 55 ampere-hours in capacity.
